

# Trend Micro™ Threat Intelligence

Comprehensive, expertly curated threat insights to empower your team's proactive security strategies

## Proactive cyber defense with real-time threat intelligence

Today's threat landscape moves faster than ever. New exploits make headlines daily, while many more go undetected until damage is done. Security teams are left wondering, "Am I at risk of being targeted and by whom? What did I miss and what should I do next?" You need a threat intelligence solution that cuts through the noise with real-time visibility, context-rich analysis, and actionable insights tailored to your industry and region. Understand who's targeting you, proactively prioritize threats, and respond decisively—before, during, and after an attack.

## Intelligence that anticipates and outpaces threats

Leverage decades of research and the broadest sensor coverage for deep visibility into threat activity and attacker behavior. Additionally, it incorporates Trend Zero Day Initiative™ (ZDI), the world's largest zero-day vulnerability discovery program, for enhanced threat detection and response. Integrated into our AI-powered enterprise cybersecurity platform, Trend Vision One™, enrich XDR alert investigations by revealing the "who, why, and how" behind attacks, while elevating cyber risk exposure management with threat intelligence that links emerging threats, actors, and hunting queries to specific CVEs for faster, more informed decisions."

### KEY BENEFITS

- Stay ahead of attacks with early, actionable intelligence
- Minimize breach impact through faster, smarter response
- Reduce risk with targeted threat prevention
- Strengthen defenses with adversary-specific insights
- Regain control with clear, prioritized next steps

Actionable  
intelligence

Reduced  
risk

Regained  
control

## Built for deep integration across your security stack

Gain insights far beyond endpoint threats for actionable context across email, server, cloud, and network layers. Fully integrated with Trend Vision One, Threat Intelligence delivers deep insights into emerging threats, threat actors, vulnerabilities, and indicators of compromise (IoCs), providing you with unparalleled intelligence for proactive security measures.

### Cross-layer visibility

- Integrate intelligence across endpoints, servers, email, network, and cloud
- Leverage comprehensive context to risks and threats from multiple attack surfaces

### Automated investigations

- Unify malware analysis and threat insights by integrating logs from Trend Micro and third-party sources
- Reduce manual investigation time and analyst skill dependency

### Custom intelligence sweeping

- Receive tailored threat detection with support for third-party threat feeds
- Achieve faster identification and response to threats specific to your environment

### Proactive threat and vulnerability insights

- Leverage enriched intelligence on emerging threats, threat actors, and vulnerability intelligence
- Utilize hunting queries and risk context to enrich XDR alerts and cyber risk exposure management

### Curated threat intelligence feed

- Receive comprehensive IoC reports with rich context, including CVEs, URLs, IPs, file hashes, TTPs, descriptions, malware families, industries, and countries
- Achieve streamlined operations and enhanced security by leveraging seamless API integration that connects directly with your existing security tools

### Advanced sandbox analysis

- Detonate objects, such as files and URLs, in a secure virtual environment to detect unknown threats
- Enable automatic IoC sharing across the Trend Vision One platform and safeguard your environment from suspicious and/or unknown objects automatically

## Proactive security starts here

Trend Vision One is the only enterprise cybersecurity platform that centralizes cyber risk exposure management, security operations, and robust layered protection to help you predict and prevent threats, accelerating proactive security outcomes.

Industry leading threat intelligence integrated into our platform

Offerings	Description
<b>Trend Vision One™ Threat Insights</b>	<ul style="list-style-type: none"> <li>As part of the Trend Vision One platform, Threat Insights provides you with rich context on the latest vulnerabilities, IoCs, emerging threats, and active threat actors that are likely to target you</li> <li>Integrated across endpoints, email, networks, and cloud layers, it empowers your team with deep insights into a unified view of risk and threat activity. Automated investigations and custom intelligence sweeping allow you to reduce manual effort and enable faster, more accurate incident response</li> <li>With proactive intelligence on campaigns, adversary tactics, and zero-day vulnerabilities, your team can stay ahead of evolving threats and mitigate risk before exploitation occurs</li> <li>Supports threat hunting and enriched IoC analysis, helping you detect, prioritize, and respond to threats with greater confidence</li> </ul>
<b>Trend Micro™ Threat Intelligence Feed</b>	<ul style="list-style-type: none"> <li>Get curated, real-time threat data sourced from Trend™ Research and Trend ZDI.</li> <li>Leverage a rich repository of IoCs with detailed context, including CVEs, domains, and threat tactics. Seamless API integration allows you to embed this intelligence into your existing security infrastructure, enhancing your defenses with minimal disruption</li> <li>Filter data by country or industry, tailoring insights to your organization's specific needs</li> <li>With in-depth reports on threat actors, malware families, and TTPs, your team can accelerate investigations and improve incident response effectiveness</li> </ul>
<b>Trend Vision One™ Sandbox Analysis</b>	<ul style="list-style-type: none"> <li>Enhance your threat detection by detonating suspicious files and URLs in a secure virtual environment to uncover unknown threats. Integrated across Trend Vision One you can automatically analyze and share IoCs and enable immediate blocking of high-risk objects across all connected solution</li> <li>Submit samples manually or automatically, streamlining threat response and reducing analyst workload</li> <li>Centralize all submissions—from integrated and on-premises tools—in one view, improving visibility and SOC efficiency</li> <li>Respond rapidly and informally to emerging cyber risks by utilizing our local threat intelligence center. This resource delivers rich threat context, empowering your security teams to take swift and decisive action against potential threats</li> </ul>

## VOICE OF THE CUSTOMER

**That I can bring IoCs very quickly and search across my organization is a game changer. I used to spend up to a week just to answer the question of 'are we affected?'**

**Executive Director**  
Large University in USA

## About Trend Micro

Trend Micro, a global cybersecurity leader, helps make the world safe for exchanging digital information across enterprises, governments, and consumers. Fueled by decades of security expertise, global threat research, and continuous innovation, Trend harnesses AI to protect organizations and individuals across clouds, networks, devices, and endpoints. The Trend Vision One™ enterprise cybersecurity platform accelerates proactive security outcomes by predicting and preventing threats across the entire digital estate, and environments like AWS, Google, Microsoft, and NVIDIA. Proactive security starts here. [TrendMicro.com](https://www.trendmicro.com)

## Stay ahead by leveraging continuous threat insights to enable proactive security strategies.
